

Have your say on the future management of CHIPPING NORTON LAKES

Do you live near Chipping Norton Lakes?
Do you spend time there?
Would you like to know about the Lakes?

The State Government in consultation with Fairfield and Liverpool Councils, and the Chipping Norton Lakes Authority (CNLA) are preparing to create a new state park at Chipping Norton in Western Sydney. The Chipping Norton Lakes State Park will be made up of Crown reserves under Council management, some Council owned community lands, waterways owned by the Lakes Authority and some lands owned by Department of Planning.

A Management Plan, Master Plan and Business Plan are being prepared to guide the future management of the reserve. The plans will consider, amongst other things:

- Current and potential recreational uses and improving the experience of visitors to the lakes;
- Important natural, cultural, scenic and recreational values;
- Managing the natural and cultural values, environment, including water quality, stormwater, bushfire risk, weeds and feral animals;
- Access and circulation;
- Future management and funding.

If you use any of the Chipping Norton Lakes and foreshore or would like to use the lakes and parklands, we would like to hear your views on future management and needs.

There will be a number of opportunities for the community and interested organisations to contribute. Initially, you are invited to any of the following:

- **Open Houses** – Come and have an informal conversation with the consultants and Council staff or participate in a workshop session.
- **Field Day** – Come and look at the concepts for the park as they develop and give the planning team your feedback.
