Subject: State Strategic Plan for Crown land submission: Andrew MacKenzie

Activity

Name of Activity: State Strategic Plan for Crown Land
Our Reference:: SSP Crown Land

Please provide your details

1. First name: Andrew
2. Last name: MacKenzie

4. Are you completing this survey as part of an organisation?: No

5. Organisation:

7. Suburb: Gwynneville

8. State: NSW

9. Postcode: 2500

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: I believe the greatest priority should be supporting community access to green spaces and opportunities for recreational activities in natural environments.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Neutral

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Neutral

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Neutral

Contribute to the ongoing recognition of native title rights: Neutral

Explore co-management of land to generate mutual benefits: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Neutral

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: I am worried crown land will be sold off to developers. The outcomes should explicitly state no crown land will become urbanised. It should be retained as open green space.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Neutral

Provide tools and resources to volunteer Crown land managers: Important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: I feel there are many competing interests e.g development versus conservation.

20. Where did you hear about the State Strategic Plan?: Social media

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Not at all important

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: None

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Crown Land should not be used for development. Crown Land should be used as a means to preserve Australia's ecology and act as a both recreational space, support for eco-tourism and a strengthening of native title.

Activity

Name of Activity: State Strategic Plan for Crown Land
Our Reference:: SSP Crown Land

Please provide your details

1. First name: Annabel
2. Last name: Murray

4. Are you completing this survey as part of an organisation?: No

5. Organisation: I am a Masters research student in the Science and Ecology Section of UNSW Bush Fire Research Hub

7. Suburb: Katoomba
8. State: NSW
9. Postcode: 2780

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I care about Crown land management as a resident of New South Wales

Other: As an ecologist, Crown Lands represent great potential for maintaining and regenerating biodiversity of degraded and fragmented native wood lands and habitats as vital wildlife corridors.

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Sustainable economic development is a contradiction in terms, and there are many other spaces that are already used for profit and 'economic growth'. Do not mine or farm crown lands as these are activities do not promote biodiversity or enable Aboriginal cultural land management leadership. However, agriculture using indigenous plants and biodiversity integrated sustainable farming practices would be of environmental, social and cultural benefit if engaged in a sophisticated multicultural cultural non-extractive fashion.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Not at all important

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Neutral

Prioritise the use of Crown land for green and open space in urban areas: Important

Use Crown land to expand access to affordable housing: Neutral

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

You do not mention upgrading of current buildings. Our Hall could be used so much more effectively were it to be painted and generally renovated. We could charge more for rent and more diverse groups could use it for cultural events if we had appropriate facilities. The basis is there, what is required is money spent to upgrade. And in Forster this is the only public space suitable for holding cultural events, apart from the various clubs, which all serve alcohol and have poker machines. MidCoast Council is building a Civic Centre but this is currently held up by the builder being unable to continue due to monetary problems. It will be years before this is sorted out. In the meantime there is no public hall suitable in the area. Taree, Nabic and Bungwahl are the closest. It would take so little to repaint and generally upgrade the facilities. We have recently upgraded the kitchen and bathrooms with a Stronger Regional Communities Fund grant, but this is a holding

operation, we need (comparatively) little to bring our hundred year old (next year) building up to a state where the local community will be proud of it. Surely this should be a major priority?

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures: Important

Reduce red tape for government entities managing Crown land: Very important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: I firmly believe that unless money is allocated directly for the upkeep of Crown Land buildings that much will be irrevocably lost to the various local communities currently struggling to keep their public buildings in good order and places to be proud of. All your suggested initiatives are really important, but if you do not maintain the infrastructure, the buildings that are part of our heritage, what is the point?

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: I can only reiterate, if Crown Land buildings are not maintained properly, then valuable heritage will be lost.

20. Where did you hear about the State Strategic Plan?: Correspondence from the department

7. Suburb: Seelands
8. State: NSW
9. Postcode: 2460

[Redacted]

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for my business, I am a Native title claimant over areas of Crown land, I use Crown land for recreation, I care about Crown land management as a resident of New South Wales, Other

Other: As a Gumbayngirr man I have a Cultural responsibility to protect our cultural assets. The management of the Crown land estate is of extreme importance to me as there is a large proportion of Gumbayngirr Country under the management control of various Crown land managers.

12. What use/s of Crown land do you value?: Aboriginal land rights, Biodiversity, Jobs and economic growth, Other

Other: Cultural activities including spirituality.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Neutral

Strengthen and support evolving community connections: Neutral

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Expanding green space should not be prioritised over the rights of Aboriginal people to rightfully claim land under the NSW Aboriginal Land Rights act 1983 or by way of negotiation via the, now questionable, Crown lands land negotiation process (LNP). Economic development must be community, environmentally and culturally appropriate for the location

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Neutral

Assist new sustainable energy, resources and infrastructure projects: Neutral

Facilitate investment on Crown land: Important

Prioritise the use of Crown land for green and open space in urban areas: Of minor importance

Use Crown land to expand access to affordable housing: Neutral

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Neutral

Partner with the organisations that serve our communities: Neutral

Strengthen and uphold compliance to ensure a fair go: Neutral

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: The consultation process has been inadequate considering the importance of the strategic plan. It is difficult to provide an informed response due to the draft plans lack of detail and ambiguous language. The plan needs to instruct Crown land managers to stop being obstructionist and combative towards Aboriginal people asserting their lawful rights. Strict KPI's should be implemented to ensure action is taken to recognise Aboriginal land rights and obey the 1983 ALRA legislation. After 37 years of obstructing and hindering the process of Aboriginal land rights it is time for action not exploration. Only then can the intended benefits of the legislation be realised.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Neutral

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Neutral

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Of minor importance

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Consultation process has been inadequate. The enablers seem to be misaligned with the intended outcomes. Licensing activities should not be manipulated to deprive Aboriginal people of their lawful land rights. All perpetual Crown leases should be available to freehold by the lease holder and any encumbering dedications that have been placed over the land parcel after the creation of the Crown lease should be disregarded thus allowing freeholding to occur. The freeholding of a land parcel, that the lease holder already holds exclusive title to, will provide surety and allow for greater investment and productivity. This will also reduce the management cost of the estate.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: The consultation process has been inadequate and needs to be extended considering the 10 year life of the plan and the importance of its success. The plan must instruct the end of the obstructionist and combative approach to Aboriginal land rights implemented by Crown land managers that has led to the denial of Aboriginal peoples rights for the past 37 years. Compliance with the NSW ALRA 1983 is not optional. The suggestion of reducing red tape for crown land managing agencies is concerning considering the devastation that has occurred under their management processes and their arrogant and dismissive attitude to the public engagement. If anything their should be more scrutiny and greater input into the management processes and methods. 37 years of impeding Aboriginal land rights and avoiding co-design and co-management arrangements with Aboriginal people has led to further trauma for Country and people and this plan must instruct the end of this destructive and pointless situation.

20. Where did you hear about the State Strategic Plan?: Social media

Other: New South Wales Aboriginal Land Council. Not many people that I've spoken to knew that the consultation was happening.

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

PRIORITIES Priority 1 re commercialisation. The first priority is clearly inappropriate for much of our crown lands. We do not agree that Crown Land is merely a resource to be exploited for jobs. Obviously, provision of means of employment or source of income is important, particularly in regional areas, but this can be achieved by managing the lands in a sympathetic manner eg through weed and pest animal control, cultural burns, provision of seed banks for revegetation projects etc. Crown lands could also be leased for conservation purposes to individuals and NGOs. The Crown land adjacent to our own property at Summer Hill Creek is leased by us in this way so that it can managed sympathetically and not used inappropriately. This draft strategic plan does little to address this potential or alternative approaches. Development should be in areas already destroyed or disturbed through farming and industry, not in bushland or areas of natural open space. Crown land should not be subject to the whims of government to enable commercial opportunities. Expanding industries, unless to benefit the environment, should be not be permitted in Crown land with natural values. Priority 2 Expanding green

space. This could be an excellent initiative, but needs to be better defined. If it is simply more football fields, it will not help meet the state's ecological sustainability goals. Where is the priority to provide habitat for threatened species and communities? And why would you include social housing in this section. Firstly, we do not agree that social housing should be placed on crown land, unless it is already incorporated in the urban landscape, and secondly, it should be included under Priority 1. Priority 3 Strengthening communities. We support the outcomes 'support and restore environmental values on Crown land' and 'to build resilience in a changing climate' but feel that these statements are at odds with most of the other strategies. How will these outcomes be weighed up against the development strategies?. This outcome also appears to be in an inappropriate section as it is not really about 'strengthening communities'. We strongly suggest that this outcome 'support and restore environmental values on Crown land' be changed into a priority of its own with its own set of outcomes. This section could then include policies in respect of how to manage high conservation value land, particularly Travelling Stock Reserves, so the areas needed conservation could easily be identified and kept safe from development. Priority 4 Aboriginal communities. We support this priority of expediting the transfer of title on lands where there are title claims and to effect employment opportunities, particularly in respect of managing the land. These lands are all that is left to make restitution to the original people of this land.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Neutral
Simplify licensing for domestic waterfront structures:	Of minor importance
Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important

We support most of the enabling initiatives, especially making information more transparent. This section of the draft is to be commended. A map showing all crown land, including TSRs, with the supporting data available for interrogation, would be a good start. However, we do not support reducing red tape if it means that there is a higher risk of damage to the environment. Due process, a sophisticated approach environmental assessment and comprehensive community consultation are all essential to ensure that these lands are managed in a way that will enhance environmental values and prevent inappropriate development

Other feedback

Whilst there are some very good sections in this plan, which is very broad in scope, there are also many statements that need better definition, areas where we disagree with the priorities and many gaps that need plugging. Of major concern is the very lower priority status given too the environment in most areas, for example, in the statement concerning the quadruple bottom line. Following that principle, the environment will always come last and that would be devastating for many of these areas of land of high conservation value. The draft plan is, therefore, at odds with the stated aims of state government in trying to stem the loss of biodiversity. What little is left of the natural landscape in the Central West forms a critical network of diverse natural habitat and corridors and it is really important that as much as possible of this is left in its natural state to provide a refuge for native flora and fauna, including our rapidly diminishing threatened species. A good example of this can be found close to Orange. Many (over 40) parcels of land were at one time included in the Canobolas Regional Parkland Trust. When this was broken up, some lands, such as Mount Canobolas and Borenore Caves, were incorporated into the national parks system. Other lands of equally high conservation status were left as Crown land due to their potential for mineral exploration. One such land, South Mullion Reserve, became the subject of a Community Biodiversity Survey, in which I participated, and was found to contain many threatened species, but again it was not possible to have it converted to national park due to ministerial veto. I describe this land as it is a typical example of an area of crown land that should not be considered as available for any kind of impactful development. The environmental values are extremely high and it is only due to its potential mineral content that it has not already been gazetted as national park. The draft Strategic plan falls short in respect of acknowledging and making provision for environmental values and we would very strongly support an additional priority to conserve high conservation value lands and enhance environment values in all lands.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Explore co-management of land to generate mutual benefits:	Neutral
Collaborate with Aboriginal groups in each place to improve outcomes:	Neutral
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	Native title is a farce. That premise has been used time and time again against aboriginal peoples. As soon as developers or miners are interested then the stuff under the top soil is no longer deemed aboriginal land. You take it back and deceive aboriginal peoples. Affordable housing is also a farce. More public housing is needed not the sell off of housing stock thats happening right now and has for a long time. Public housing tenants cannot afford 'affordable housing'. Affordable housing is a con job
Please provide your feedback	

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes:	Important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	Given 42 % of NSW is Crown Land and 85% of that land is west of the Newall Hwy why has the draft plan skipped over it and put most of the emphasis on eastern and coastal regions. These large rural areas seemed to be forgotten and as such their management easily given away. Continuous of use and occupation must be addressed with all Community groups including the

Aboriginal groups before further engaging with co-management or native title claims.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Important

should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Neutral

Provide tools and resources to volunteer Crown land managers: Important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: <https://www.change.org/p/crown-lands-canada-bay-council-to-return-howley-park-east-to-the-community-return-howley-park-east-to-the-community>

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Decades ago Crown Lands/ NSW Government allowed a road to be built on Howley Park East Park at Drummoyne. This road was built to satisfy the operational needs of a privately owned marina. This is a scandal. This section of parkland should never have been alienated. The Marina now has a licence on this parkland. The licence was issued in secret without public debate and there was no transparency. This alienated land should be restored as parkland and returned to the public for recreation.

20. Where did you hear about the State Strategic Plan?: Other

Other: I was advised by a community group in the City of Canada Bay Council LGA

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Renewable energy, Other

Other: Wildlife corridors, provision of environmental ecological functions eg cleaning water via natural vegetation, absorbing noise via tree and bush barriers, cleaning air by filtering out pollutants, providing areas for native flora and fauna, providing remnants of endangered ecological communities.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience: Neutral

Strengthen and support evolving community connections:	Of minor importance
Work with Aboriginal communities to realise the potential of their land rights:	Neutral
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	Yes, first and highest priority must be to ensure any land in question has been assessed for its ecological value. At this point in time we can no longer afford it to destroy our natural ecological support system. If the considered parcel of crown land has any values like high biodiversity , important natural habitat or other important functions to offer, eg being or could become one of the missing wildlife corridors, riparian zone, natural swamp or simply fairly good natural bushland this should be mandating its protection. Its inclusion or becoming a new National Park should be the highest priority. If this has been assessed by biodiversity mapping and an overall environmental masterplan and clearly the land is not suitable or needed for those environmental purposes then and only then other issues can be considered, but only those where the land remains public land. I trust you support this, if not please phone me asap as the submission deadline is today.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:	Strongly disagree
---	-------------------

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Of minor importance
Expand regional tourism:	Of minor importance

Explore co-management of land to generate mutual benefits:	Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Neutral

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Yes, changes should be made to clearly identify that ecological values and functions are of highest importance and need preservation and restoration. Outcomes of importance should be species preservation, and recovery of endangered species, highest water quality in natural creeks and rivers, reduction of air pollution, reduction of invasions by exotic species including human disease bearing species , reduction of carbon in the air, and measuring of temperatures in our environments.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Important

Standardise leases and licensing for common activities: Of minor importance

Simplify licensing for domestic waterfront structures: Of minor importance

Reduce red tape for government entities managing Crown land: Of minor importance

Provide tools and resources to volunteer Crown land managers: Neutral

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Northern Beaches Envirolink requests that environmental ecosystem functions, biodiversity , natural bushland protection etc are the most important goals for our crown land and hence enabling initiatives would be making on all crown lands environmental assessments.

Other feedback

Local crown land on the Northern Beaches provides habitat for an astonishing amount of species, including many endangered and threatened flora and fauna species and ecological communities. Prior to any other consideration the intrinsic values of these natural bushland blocks must be understood, monitored and evaluated for their intrinsic values before other uses are considered. Some of our most important bushland/ wildlife corridors have been destroyed by unreasonable road developments and restoration of these corridors should be highest on our planning list. Development pressures are very high in our local area, but our grandchildren's survival is becoming endangered by the ruthless expansion of our ecological footprint and our Crown Land must be used to halt and mitigate the effects. Crown Land can do this and a more ambitious goals need to be applied.

9. Postcode: 2085

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales, Other

Other: The Belrose Rural Community Association has members in the Belrose North and Oxford Falls area. We have large stretches of natural bushland with high conservation value eg threatened and endangered flora and fauna and threatened ecological communities in our surrounds, which we value highly for their beauty, iconic nature, biodiversity and interconnectedness. Further we highly value the ecosystem functions of noise suppression from the main roads, clean air from the filtering effect from bushland vegetation, darkness at night time from the barrier of bushland towards the lit up streets and peaceful ambience for our personal well-being. We also appreciate the carbon sinking function natural bushland provides and the natural temperature regulation which is provided by the surrounding bushland.

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Other

Other: Wildlife corridors, bush regeneration, flora and fauna studies, mental recreation by taking a walk and or having a picnic and listening to birds and frogs.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Of minor importance

Strengthen and support evolving community connections: Not at all important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Yes, preservation and restoration of the ecological functions of Crown Land should be the top priority. The other above listed priorities must fall below that highest quality of preservation and restoration.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Of minor importance

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: To enable the a strategic plan as we would like it we need: - detailed assessments of biodiversity and other ecological functions - public access to the assessments - making plans together with the government when and while this information becomes available

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Belrose North and Oxford Falls are parts of the Middle Harbour Catchment and Narrabeen Lagoon Catchment with outstanding biodiversity. Recently a koala has been sighted and a few years back evidence of a spotted tailed quoll was produced. this is an area close to Sydney with large areas of natural bushland covering Crown Land and allowing those rare species to survive. Many other threatened species flora and fauna and ecological communities are here present and their protection is only possible when other interests like recreation and development are kept in bound. We are proud to still have such amazing surrounds and bushwalking has during the COVID pandemic increased about 20times. (judged by the average amount of cars parked at the entrances to our local bush tracks) Bushwalking provides relaxation and physical activity and people are very much appreciating this.

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department The outcomes are not clear, particularly in column 1. For example facilitate investment? What type of investment? To create what?

should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures: Of minor importance

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

The initiatives and other content of the Plan should include recommendations for the Crown Land Inquiry 2016 (to which this organisation provided a submission). This includes an audit of the values of Crown Land and their environmental significance at local, regional and federal level and listing of all Crown Land for public information. Mas should be included with the Strategy. How can a true response be provided if this information is not available. Crown lands were retained for the use of the community and top priority is to maintain them for the future.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

The CEC would like to provision of the maps and other information from the recommendations from the Inquiry. Is the content consistent with local Council Strategic Plans and Local Environment Plans and other planning documents? This should be referred to in the Strategy. In our shire the majority of coastal Crown Land is managed by our Council, generally in a sustainable manner for conservation and recreation. There have been examples where the state authorities have intervened and alienated the land for commercial purposes and damaged or eliminated areas of high conservation value. Where Councils have a good track record of management then additional funds should be allocated for the management. Currently the funding through DPIE Lands is minimal to manage land under their management or under Council. The responsibility of management was passed from state to local government after the adoption of the Act in 2016. We support this action but requires adequate funding for the sites. The Strategy must take into consideration the current crisis of climate change and retain as much Crown Land as possible for the purpose of increased biodiversity and conservation

20. Where did you hear about the State Strategic Plan?: Other

Other: Colleagues through email.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience:

Strengthen and support evolving community connections: Not at all important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Provided that “expanding green space sustainable quality of life and climate resilience” does not mean that these areas of crown land will all become locked and gated national parks and thus become unavailable for trail bike riding, four wheel driving and other associated activities then the above priorities are fine. There are already a large amount of national parks that are very restrictive in their permissible usage. We do not need to restrict the use of other areas of crown land to the same degree. I also want to see “green spaces expanded” but not restricted in permissible usage to the same extent as national parks.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

There is a serious lack of emphasis on nature conservation. Many of these priorities have the potential for significant environmental harm. Of course this depends on the management guidelines but the conspicuous absence of reference to environmental outcomes is cause for concern. No activities should occur on Crown lands with significant environmental assets that cause any form of damage to those assets, especially flora, fauna, waterways and wetlands.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Important

Expand regional tourism: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Again, there is little mention of nature conservation. We are in the midst of an environmental crisis. It is vital that all Crown land with intact ecological assets be protected from any damaging activities. There is currently an epidemic of land clearing occurring in NSW following recent and disastrous changes to native vegetation laws. The states water resources are seriously mismanaged, irrigation water is over allocated, rivers and wetlands are dying all over the state. Crown lands can play a significant role in preserving

natural assets and indeed, have been a substantial contributor to the NSW national park estate in less greedy and more enlightened times.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Important

Standardise leases and licensing for common activities: Neutral

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: It is impossible to answer many of these questions. The strategic plan provides potential opportunity for the serious misuse of Crown Land. As Crown Land varies considerably in nature it is somewhat absurd to be attempting to treat it all equally. The template appears to be only concerned with exploiting public land for private gain.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: I personally use Crown Land for nature based activities such as bird watching and access to fishing spots. Often, in rural areas, Crown Land such as TSR's, reserves, cemeteries and roadsides contain the only remnants of native vegetation. These area should be protected and public access guaranteed at all cost . Whilst there is no direct financial gain in such areas they attract visitors which in turn put money into local communities through services provided. The government should not be offering to lease all public land. Katoomba Airfield is an obvious example of a site that is clearly inappropriate for it's intended use. The current proposal has serious environmental and social consequences and no public benefit whatsoever. It should never have been offered for lease.

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: With respect to the outcome to use crown land for green and open spaces in Urban areas, I would like the outcome to include rural and remote locations too. In this way the benefits are far reaching to a greater population. Remote and rural areas are seeing less and less green areas due to the effects of lessened river flow, bushfires and increasing temperatures. This could encompass several of the above outcomes.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Important

Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

It seems that many of these enabling initiatives are for pure financial gain. Maybe this is my perspective as a non-business community member. Some "think tank" enabling initiatives could be developed with the younger generations at specific youth conferences run by government to look at ideas that the next generation may have. I understand that Economic Initiatives are necessary, but to incorporate Economic with Environmental initiatives is something that the younger generations have a passion for. By encouraging their input, I believe you will have a long term view as to the Potential of such Crown Land uses.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I have a few questions regarding terminology used in the draft plan ... Who are the "Key Stakeholders" you have been talking to? With respect to Australian Native Title, what is an essential public purpose? Another aspect of the plan I would like to comment on are the 34,000 crown land reserves dedicated for public purposes and the right to change the nominated purpose by ministerial decision. I think this process would definitely need to be VERY transparent if it went ahead. I am sceptical of a fair outcome in such cases.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Aboriginal land rights, Biodiversity, Other
Drought mitigation, i.e, forest creates rainfall. It is known as a "Biotic Pump". Too much of the language in the plan is about "Development" and "Unlocking" resources.

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Not at all important

Work with Aboriginal communities to realise the potential of their land rights: Not at all important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

The language is ambiguous enough to facilitate unfettered development in all categories.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:

Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Of minor importance

Expand regional tourism:

Assist new sustainable energy, resources and infrastructure projects:

Facilitate investment on Crown land:

Prioritise the use of Crown land for green and open space in urban areas:

Use Crown land to expand access to affordable housing:

Support and restore environmental values on Crown land:

Manage Crown land to build resilience in a changing climate:

Sustain the places where people come together:

Partner with the organisations that serve our communities:

Strengthen and uphold compliance to ensure a fair go:

Make Aboriginal land transfers a priority – and see them as an opportunity:

Contribute to the ongoing recognition of native title rights:

Very important

Explore co-management of land to generate mutual benefits:

Collaborate with Aboriginal groups in each place to improve outcomes:

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Again the language is so vague that, for example, asking a person if they are in favour of sustainable energy like solar/wind-power etc, could merely mean more coal mines and CSG.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.:

Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:

Standardise leases and licensing for common activities:

Simplify licensing for domestic waterfront structures:

Reduce red tape for government entities managing Crown land:

Provide tools and resources to volunteer Crown land managers:

Build understanding of native title:

Engage and support a new generation of Crown land managers:

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

It sounds more and more like open slather on developing/destroying bushland.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

The "strategic" part is the language used in this submission form. It is as if it were formulated by an Encyclopedia Britannica salesman.

20. Where did you hear about the State Strategic Plan?:

Social media

Other:

12. What use/s of Crown land do you value?: Community use

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Of minor importance

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Important
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Very important
Prioritise the use of Crown land for green and open space in urban areas:	Of minor importance
Use Crown land to expand access to affordable housing:	Of minor importance
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Important
Sustain the places where people come together:	
Partner with the organisations that serve our communities:	Very important
Strengthen and uphold compliance to ensure a fair go:	Important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Neutral
Contribute to the ongoing recognition of native title rights:	Of minor importance
Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Torakina Park, Brunswick Heads. Suggest road down the centre with fingers off road for parking. Walking/bike path around the edge of Torakina Park to upgrade existing dirt path.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Very important

Reduce red tape for government entities managing Crown land: Very important

Provide tools and resources to volunteer Crown land managers:

Build understanding of native title: Of minor importance

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Plan to upgrade Torakina Park which is a section of land which was originally a sands spit which was mined for zircon rutile and subsequent had a rock wall built around and revegetated. It is now ready to be put back for community and visitors use as it was previously.

Other: We are the Lennox National Surfing Reserve formed back in 2008 as custodians of the ocean from Lennox/Alstonville SLSC to Flat Rock Beach.

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

We would not like to have commercial interests or decisions being made without community consultation.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:

Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Important

Expand regional tourism:

Important

Assist new sustainable energy, resources and infrastructure projects:

Very important

Facilitate investment on Crown land:

Of minor importance

Prioritise the use of Crown land for green and open space in urban areas:

Very important

Use Crown land to expand access to affordable housing:

Not at all important

Support and restore environmental values on Crown land:

Very important

Manage Crown land to build resilience in a changing climate:

Very important

Sustain the places where people come together:

Very important

Partner with the organisations that serve our communities:

Very important

Strengthen and uphold compliance to ensure a fair go:

Very important

Make Aboriginal land transfers a priority – and see them as an opportunity:

Very important

Contribute to the ongoing recognition of native title rights:

Very important

Explore co-management of land to generate mutual benefits:

Very important

Collaborate with Aboriginal groups in each place to improve outcomes:

Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

In reference to Aboriginal land transfer we would like to see this to be in collaboration with impute from the Shire Council & Lennox National Surfing Reserve

Please provide your feedback

17. These are the best enablers to support delivery of the plan.:

Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:

Very important

Standardise leases and licensing for common activities:

Very important

Simplify licensing for domestic waterfront structures:

Very important

Reduce red tape for government entities managing Crown land:

Very important

Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	In reference to the reduction of red tape we believe this to be very important to enable us to expedite issues that may need to be actioned or attended as quickly or urgently.
Other feedback	
19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	We agree with the strategic plan in principle & definitely would like to included in any decisions in reference to the Reserve.

4. Are you completing this survey as part of an organisation?: No

5. Organisation:

7. Suburb: Hurlstone Park
8. State: NSW
9. Postcode: 2193

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy, Other

Other: Crown land that is owned or co-managed by Indigenous communities- as a way to not only boost economy (mainly through tourism opportunities) but more importantly continue culture- when I have visited crown land where this is the case (e.g. Booderee National Park) the experience has been incredibly special, it is something that I will now forever value.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience:	Very important
Strengthen and support evolving community connections:	Very important
Work with Aboriginal communities to realise the potential of their land rights:	Very important
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	Indigenous Custodianship, Land management and Co-management should be strongly prioritised- not just '...realising the potential...' Green space initiative must favour the biodiversity and ecological value of the space over solely recreational purpose.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Neutral
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Not at all important
Prioritise the use of Crown land for green and open space in urban areas:	Very important

Make Aboriginal land transfers a priority – and see them as an opportunity:	Very important
Contribute to the ongoing recognition of native title rights:	Very important
Explore co-management of land to generate mutual benefits:	Neutral
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	I am very worried about investment outcomes and expanding access to affordable housing on Crown Land. I strongly believe that there are more sustainable ways for these ideas to work rather than gazetting land. Our Australian biodiversity is extremely unique and endemic to particular areas, we need to find a way to celebrate this rather than expose them to

extinction through land development. Co-management of these spaces with local First Nations peoples may be a good way to meet in the middle.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

- Make more of our information available and transparent: Very important
- Standardise leases and licensing for common activities: Important
- Simplify licensing for domestic waterfront structures: Not at all important
- Reduce red tape for government entities managing Crown land: Not at all important

- Build understanding of native title: Very important
- Engage and support a new generation of Crown land managers: Very important
- Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

- environmental values must be a key priority & not subjugated to economic goals because in the long run we will lose economically if the environment is not properly prioritised (e.g. think about health, and how important being in nature is! If we destroy this, a lot more people will be staying home from work in the long run.) - Prevent the disposal of any crown land until Treaty - First nations people as owners/ co-managers of Crown Land -Crown Lands should not be privatised or sold -priorities must be transparent and un-ambiguous

20. Where did you hear about the State Strategic Plan?: Social media, Other

Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales
Other: As an Aboriginal person I visit sacred sites and rock art when travelling

12. What use/s of Crown land do you value?: Open or green space, Aboriginal land rights, Biodiversity, Other
Other: Historical significance. Both colonial and Aboriginal

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance
Expand green space, sustainable quality of life and climate change resilience: Important
Strengthen and support evolving community connections: Important
Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

I am distressed when jobs and growth is used to excuse destruction of natural habitat. Work should be done hand in hand with Aboriginal communities to ensure our Crown lands are kept pristine and as close to their natural state as possible

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Of minor importance

Expand regional tourism: Neutral

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

8. State: NSW

9. Postcode: 2630

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Community use, Aboriginal land rights, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: At A high level these priorities are very good. I would prefer to see more specific information such as how are unused rail easements being utilised.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Very important
Expand regional tourism:	Very important
Assist new sustainable energy, resources and infrastructure projects:	Neutral
Facilitate investment on Crown land:	Neutral
Prioritise the use of Crown land for green and open space in urban areas:	Important
Use Crown land to expand access to affordable housing:	Neutral
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Neutral
Sustain the places where people come together:	Very important
Partner with the organisations that serve our communities:	Very important
Strengthen and uphold compliance to ensure a fair go:	Of minor importance
Make Aboriginal land transfers a priority – and see them as an opportunity:	Important
Contribute to the ongoing recognition of native title rights:	Important
Explore co-management of land to generate mutual benefits:	Very important
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	Look at use of unused rail easements as a particular opportunity and proceed with gazetting the easements for non train use, but still as community owned land. Facilitate rail trails for walking and cycling.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important

15. These are the best outcomes for Crown land over the next 10 years.:

Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Important

Expand regional tourism:

Assist new sustainable energy, resources and infrastructure projects:

Important

Facilitate investment on Crown land:

Very important

Prioritise the use of Crown land for green and open space in urban areas:

Important

Use Crown land to expand access to affordable housing:

Not at all important

Support and restore environmental values on Crown land:

Manage Crown land to build resilience in a changing climate:

Important

Sustain the places where people come together:

Very important

Partner with the organisations that serve our communities:

Very important

Strengthen and uphold compliance to ensure a fair go:

Important

Make Aboriginal land transfers a priority – and see them as an opportunity:

Of minor importance

Contribute to the ongoing recognition of native title rights:

Of minor importance

Explore co-management of land to generate mutual benefits:

Important

Collaborate with Aboriginal groups in each place to improve outcomes:

Of minor importance

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Think about ceding the title of the land to organisations such as the Cootamundra Rifle Club, at no cost to the Club . After all this land is a designated Rifle Range, and has been since 1888.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.:

Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

[REDACTED] his submission is in response to the request for stakeholder comment on how Crown Land can support NSW. The Coffs Harbour Yacht Club strongly supports the idea in the 'State Strategic Plan – A Vision for Crown Land', to improve duration of tenure over Crown Land, so that organisations have a stable base from which to grow and thrive. Coffs Harbour Yacht Club has been on the current Crown Land site adjacent to the Harbour since it was established in 1961. A new concrete and brick building was built in 1975 and the last lease was for 20yrs from 1/7/1997 Today, despite attempts to renew the least over the last few years, the Club's tenure ends on 30/6/21. Without the security of a long term lease the expansion (to meet the growing needs of the 15 community groups the use the Clubs facilities plus the Australian Sailing Olympic team), renovation and refurbishment of the building (required due to the harsh seaside environment) and the adding of disabled access and toilets cannot happen. Being a community, volunteer not-for-profit group, which has the primary objective of providing facilities in Coffs Harbour to foster, promote, encourage and support the sport of sailing boats, seamanship and other aquatic sports the Club needs the security of long tenure to invest providing those facilities. Garth McGilvray, AM, CHYC Treasurer

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Neutral

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: I believe that we should be increasing green spaces and maintain our old growth land. I would like to see more First Nation people involved in maintaining an environmental approach to this. Areas that have been native animal areas and specific to certain areas and species need help for their survival. I do not want to see more green areas leveled for the sake of developing an area for construction jobs.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Explore co-management of land to generate mutual benefits: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Some of these choices appear vague and I would like to strongly appose any clearing of our natural habitat for our native animals and trees they rely on. Tourism holds many avenues and some see the destruction of the environment to make accommodation in the middle of an environmentally important area. Tourism is important but not at the expense of our reducing natural environment. More First Nation collaborative projects are needed to reclaim land that has been over used and given life again by reclaiming it into the environment. This can be helped in some industries by making green and

food waste in communities into compost for land to be enriched. I see that industry to be lacking across states.

Please provide your feedback

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Red tape seems to be a catch phrase that has a double edge sword. It appears to me governments use this for fast tracking construction when there is an environmental impact. I consider this to be in place around city forest areas put in for clearing to enable big developers to make more apartments. Trees and our environment should not be looked at as areas for free use by developers and their backers. Climate change needs to be reflected and made a priority when addressing Crown land.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: The terms specified here need to be addressed. Priority given to increase our green Crown lands, have first nation people connected to specific areas involved in regrowing our green landscape and not have Crown land a free for all developers. Doing such a thing would be an environmental catastrophe and one that will not reflect well in the future. I would like to see dormant buildings and inner city wasted land purchased for development over any reduction of green space, I would like to see the government take into consideration of how to reduce fires in these green spaces to save species of animals and plants for our future generation and allow clean air to be a thing in Australia as air quality is an important aspect for the health of our nation. To be clear, green spaces must not be put at risk.

Proposal: Disused Rail Corridors (Crown Land) be made available for Rail Trails or handed to Local Aboriginal Land Councils I am particularly concerned about the disused rail corridor between Goulburn and Crookwell and the fact that 'weekend warriors' use these areas for ATV / Quad bike and Dirt bike racing etc., disturbing the peace of the rural areas that border the disused rail corridors. Locals have been informally suggesting that this rail corridor (and others) be used for a rail trail, as has been the success outcome in Victoria, New Zealand and other locations around the world, for nearly 20 years. In 2014 an incorporated body was formed to formally submit a request that Parliament approve and fund the use of this disused rail corridor as a Rail Trail. At least 3 submissions have been made to state government, with another in progress, without any sign of progress being made. A total waste of time, resources and productivity of locals, public servants and Parliament, as proposals are submitted, reviewed and rejected. I understand the State Government pays a fee to John Holland to 'maintain' the disused rail corridors across our state. I also know of farmers who have just sequestered the disused rail corridor for their personal use. We are using my (and other NSW citizens) taxes to pay a company (John Holland) to maintain the disused rail corridor when local farmers have taken it for their own use or 'weekend warriors' come to town to destroy the peace and quiet of the area. I haven't seen a John Holland person anywhere near the 2-kilometer section of disused rail corridor at my place. An act of Parliament is required to change the use of a disused rail corridor and formally place the rail corridor in the hands of an LGA to manage as a Rail Trail. The current practice seems to pass legislation one rail corridor at a time. A heavy demand on the public service and parliament for what should be just a 'rubber stamp' process. The productivity of this process needs to be questioned. In the mean time, and for the most part non-locals, use these disused rail corridors for their own advantage and not that of the locals or general public. There are a number of LGAs making or wanting to make submission to turn some of these disused rail corridors into Rail Trails. There are other disused rail corridors where the land is gradually being returned to native habitat. Why not had these disused rail corridors over to Local Aboriginal Land Councils (LALC) to manage as natural habitat, without costs, and save the fees to John Holland and use our taxes for Covid recovery instead? I propose that all disused rail trails ought to be passed into LGA hands as a single, one time act of Parliament, to either administer as a Rail Trail or to be handed over to LALC to manage as part of their heritage, (or any other purpose the review identifies). Right now these disused rail corridors are an overhead to the State Parliament, are not being managed, and could be a source of revenue for the State. Both outcomes could draw tourists and potential revenue for our State and LGAs. Right now this Crown Land is being abused. Thanks for your consideration. Ian Anderson

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:

Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Important

Expand regional tourism:

Very important

Assist new sustainable energy, resources and infrastructure projects:	Very important
Facilitate investment on Crown land:	Neutral
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Important
Support and restore environmental values on Crown land:	Very important
Manage Crown land to build resilience in a changing climate:	Very important
Sustain the places where people come together:	Very important
Partner with the organisations that serve our communities:	Very important
Strengthen and uphold compliance to ensure a fair go:	Very important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Very important
Contribute to the ongoing recognition of native title rights:	Very important
Explore co-management of land to generate mutual benefits:	Very important
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	As per prior recommendation, group like use land use together and move an act of Parliament to move these land use types into the hands of LGAs who can better respond to community needs

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Very important
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Very important
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling	I think there needs to be a review of Local Aboriginal Land Council boundaries before allocating crown land. For example in Goulburn, I

initiatives, or are there any other enabling initiatives you would like to suggest?:

understand there are some disputes between the Wiradjuri people, who are the current recognised Land Council, Nunganwall, and Gundandarra peoples. Goulburn, I understand was a 'meeting place'. South of Goulburn down to Canberra, Nunganwall. North of Goulburn up to Katoomba, Gundangarra. It is difficult to have a welcome to country here for the fear of offending one of the other people groups ... Handing over crown land to the wrong group could be a major offence

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

NPA Illawarra Branch welcomes the opportunity to comment on this Draft Strategic Plan. The National Parks Association of NSW (NPA) was established more than 60 years ago with the mandate of advocating for the expansion and protection of national parks, other reserves and natural places while connecting people to nature. Our branch takes an interest in many developments in our local area as well as state and federal government policies. NPA Illawarra is pleased to see the first overall plan for the 42% of NSW which is technically Crown land. We agree that the category of land is not well understood and applaud the government’s efforts to explain it. We appreciate that the presentation of the plan is dominated by photographs of natural areas that showcase the range and beauty of our state’s natural heritage. We also appreciate the plan’s emphasis on the rights and role of Aboriginal people in using and managing much of this land. The term ‘Crown lands’ is colonial in origin and now misleading. These lands are in fact public land, ‘held in trust by the NSW government on behalf of the community’. The extent of the lands, particularly in the west of the state, means that they are very varied, have many uses and may be managed by other government entities or leased. Hence Crown Lands do not appear to citizens as a single land category, like private property, and their governance is obscure. On the face of it grazing leases, Aboriginal land, urban parks and natural areas do not appear to have much in common. It is only by looking at specific examples that it is possible to grasp the meaning and implications of this category. We propose the example of Lake Illawarra. We are familiar with Lake Illawarra, having recently written a submission on the Draft Lake Illawarra Coastal Management Plan (CMP), not yet endorsed by the state government. This large coastal estuary south of Wollongong is an enormous environmental and recreational asset, but has a difficult management history and now involves many owners and other stakeholders. The CMP says (p5): Predominantly the Lake is co-managed by Wollongong City Council (WCC) and Shellharbour City Council (SCC), with support from State agencies such as the Office of Environment and Heritage (OEH), and Department of Industry –Lands and Water (Crown Lands) (herein referred to as “DOI – Crown Lands”). Most notably, DOI –Crown Lands now manages the Lake Illawarra entrance management works. Crown lands are subject to Native Title claims and the CMP notes that (p6): The entire CMP study area is included in the Native Title Claim (NC2017/003 South Coast People, registered 31/1/2018). No determinations regarding this Claim have been made to date. The Aboriginal community is thus a major stakeholder with

potentially significant rights and responsibilities for the Lake and surrounds. The CMP map (p6) below illustrates the range of tenures and the difficulties for managing the Lake consistently as a whole. The enormous modifications made to the entrance and the costs and difficulty of maintaining the permanent opening fall to the Department of Primary Industries as Crown land manager. This provides a public service appreciated by many but at enormous ongoing financial cost, and has changed the Lake's ecology significantly. We do not see that the draft strategy gives guidance on how to weigh up the factors involved in such a challenge. We are not clear as to whether the land adjacent to Warrawong shopping centre showing in blue as 'Government Property NSW', is in fact Crown Land, for it does not appear to have a particular purpose. It includes an ecologically sensitive wetland in need of protection, so we would hope that it is included under the umbrella of Crown Lands. The CMP sets out a management strategy that applies to all these tenures, but it cannot succeed if the policies and decisions of the various land managers override it. Clear overriding principles of environmental protection, Aboriginal rights and long term public interest should prevail. The present draft strategy is one avenue for establishing such principles in relation to the public land involved. However we are concerned at the language used in stating its principles, eg: The world is changing at a rapid pace, it brings into focus the need for optimising public land for multiple benefits that deliver tangible outcomes for the economy, the environment and our social wellbeing (p27): And (same page): To ensure that we generate the best outcomes for the entire NSW community we will seek to optimise the economic, social, cultural and environmental opportunities generated by activities on Crown land, for current and future generations. We are disturbed at the strategy's emphasis on multiple uses and the apparent predominance of economic benefits. We are also concerned at the proposals to change Native Title processes and trust that this would not go ahead without full consultation with Aboriginal authorities. We suggest that a long term vision must emphasise those values that are enduring and essential to our national identity and future: preserving environmental values and Aboriginal rights. If these were core values in managing Crown lands then management plans for areas involving complex ownership structures and other challenges, such as Lake Illawarra, would be more straightforward and robust. We have submitted this section together with the map as a separate submission.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Other

Other: I use crown land as a place of recreation, of contemplation and solitude. It contributes to my mental health and general health

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Neutral

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: I believe that there should be a priority that crown land should be an educational resource and that management options should be such that the wider community can get closer to understanding the land in which we live.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Not at all important

Expand regional tourism: Not at all important

Assist new sustainable energy, resources and infrastructure projects: Not at all important

Facilitate investment on Crown land: Important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Neutral

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: I am concerned that a focus on jobs growth as a catch all phrase is likely to be used to undermine protections of environmental values. For example the phrase "green tape" is often used in a derogatory manner when in fact it is likely to be the very thing that maintains the environmental quality of a crown land asset.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Of minor importance

Simplify licensing for domestic waterfront structures: Of minor importance

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: I am always sceptical when I see the term "red tape" used without any explanation. The idea of reducing red tape is more often a way of bypassing established controls or protections often highly successful ones.

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: The term "Red tape" should not be used as it has negative connotations. The so-called "Red Tape" was put there often as an oversight for system manipulation for selfish reasons.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: An audit into all the qualities NSW Crown Land should be ahead of any further action. Also all TSRs should be examined to make them continuous again so that native plants and animals are not subject to the "Ark" affect of climate change. We need more purchase of land NOT sales particularly of TSR land. And please make these pro formas less predicated on receiving an aimed outcome. We're not stupid!

Explore co-management of land to generate mutual benefits:

Collaborate with Aboriginal groups in each place to improve outcomes:

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

The environmental architecture needs to be restored before any of the above can be determined.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Not at all important

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Not at all important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: The environmental architecture needs to be restored before anyl of the above is thought about.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Once again the governmet has made up its mind first before asking the community to comment. Community comment is an after thought of media propaganda. The government is serving the small republican group who will benefit from rezoning crown land. These are the people who donate political funds to political parties.

20. Where did you hear about the State Strategic Plan?: Radio

Other: Judging by the governments blunders last year through drought, floods and fire one would have hoped that the pollies would have some brains to get the environmental architecture right to stop droughts, bushfires and floods. Remember the hydrology cycle is on a 100 year cycle. Are you prepared for the dry period of 2022 - 2026? Are you prepared for a severe drought starting 3031, and tge big floods for 2055. No you are NOT! You are not prepared for anything.

Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Neutral
Simplify licensing for domestic waterfront structures:	Neutral

Reduce red tape for government entities managing Crown land:	Neutral
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Given the issues with recent storm surges, erosion, floods and bushfires, I would like to see all water forefronts in the future be a buffer for potential climatic changes, build resilience and provide recreational opportunities to be enjoyed by all of the community.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales, Other

Other: In 2013, I received an OAM for services to the environment maintaining, improving and protecting natural habitats I am a landowner of land adjacent to Crown Land which contains significant natural vegetation and Koala habitat and am passionate about the preservation of this land. .

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Priority "Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW" should not be included as a priority because Crown Land was set aside for the use of all people and should continue to be owned by all people. The main priority for Crown Lands should be to 'Expand green space, sustainable quality of life and climate change resilience'. As this provides essential habitat for native species including endangered and threatens species. It also makes available Crown Land for recreational purposes and to increase their quality of life. Green space also helps improve resilience to climate change. Include as a priority more avenues for funding for the maintenance of Crown Land natural environment.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Not at all important

Expand regional tourism: Of minor importance

Assist new sustainable energy, resources and infrastructure projects: Not at all important

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other The Outcomes: Outcomes facilitating investment and industry on Crown land, provision of housing should not be included. A better outcome would be restraint of population growth. All current Crown Land should be maintained for green and open space.

outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Not at all important

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

I strongly disagree with enabling activities which I have marked 'not at all important'. I believe the enablers 'Standardise leases and licensing for common activities; Simplify licensing for domestic waterfront structures; Reduce red tape for government entities managing Crown land' simply make it easy to fast track undesirable developments and should not be considered. Increasing funding should be added to my preferred outcome 'Provide tools and resources to volunteer Crown land managers.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I believe Crown Land should not be sold off for any reasons. In particular I object to the current practice of selling off the 'Chain Roads Reserves' currently owned by Crown Lands as they provide significant flora and fauna habitat and corridors for wildlife.

20. Where did you hear about the State Strategic Plan?:

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Jobs and economic growth, Other

Other: Bushfire risk reduction

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Not at all important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Not at all important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

1: Supporting access to bush for families and that requires vehicle access. 2: Support family and community activities including camping (requiring vehicle access, Wood burning fireplaces and toilet facilities) 3: Limiting and removing impediments to community and family enjoyment of our land. Including reversing access road closures, reversing 'sensitive area' restrictions and various 'green-tape' restrictions. 4: Conduct high levels of bushfire control management including much higher rates of hazard reduction burns and other prevention strategies. 5: Maintain OPEN SPACE, not bush. Limit and reduce the areas under tree cover and stop tree-planting activities. People need OPEN space to play and for recreation, not bush.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Neutral

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I have a lease to use Crown land

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Very important

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Very important

Support and restore environmental values on Crown land: Important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

There needs to be a clarification of the issue of Local government making money by leasing Crown. We had the lease 280 square metres to build a community facility on crown land managed by Bega Valley Shire Council.

20. Where did you hear about the State Strategic Plan?:

Other

Other:

Men's Shed Association.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Not at all important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: I feel that all Australians should be equal so I believe the Aboriginal parts in this is putting a divide into The Australian population.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Important
Assist new sustainable energy, resources and infrastructure projects:	Not at all important
Facilitate investment on Crown land:	Of minor importance
Prioritise the use of Crown land for green and open space in urban areas:	Neutral
Use Crown land to expand access to affordable housing:	Not at all important
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Not at all important
Sustain the places where people come together:	Very important
Partner with the organisations that serve our communities:	Neutral
Strengthen and uphold compliance to ensure a fair go:	Very important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Not at all important
Contribute to the ongoing recognition of native title rights:	Not at all important
Explore co-management of land to generate mutual benefits:	Not at all important
Collaborate with Aboriginal groups in each place to improve outcomes:	Not at all important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	Putting Australians up against each other only divides the population. We should all be equal and be able to use the taxpayers lands.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Expand regional tourism will be a key in sustaining long term viability and management of the environment. Leverage the economic benefits of national parks will be a key factor in doing this. There are many examples around the world of low cost high return initiatives that bring money to both regional and outer urban communities. I would suggest that the NSW government should consider an overarching plan to develop trails networks and facilities to attract and support mountain biking. This is a developing sport both globally and locally that can sustainably support many of the strategic plan objectives

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales? I am involved with a community or volunteer group that uses or maintains Crown land facilities, Other

Other:

Would like to find a space along Lake Macquarie, Preferably next door to Croudace Bay Sailing club, to have a few canoes so I can teach children, special needs, veterans or communities in need. This location has public toilets has a level ground (which is great for wheelchair users and the elderly. This sport is a great way to bond and great for mental health. Each time I write to the Lake Macquarie council it seems the places they offer are not possible. We will be doing this as a non for profit and volunteering a lot of time. I do Landcare work around Lake Macquarie and we could also help clean up areas that are not reachable by a lot of people in our Outrigger canoes that can sit 6 people. These canoes are left on beaches in Hawaii Tahiti NZ and Singapore. Maybe other countries. Its a beautiful sport with a lot of culture and were even used by Torres Strait Islanders many years ago. It is a growing sport in Australia. We would only need a moveable garden shed to put some life jackets and paddles in. The area I have been jogging around for 18months and it is hardly used. The canoes are environmentally friendly. Can be moved if necessary. Will not damage the area. All people get to try at least 3 times and the membership fees are very low which is just to provide insurance from our governing bodies Aocra. They do not need shed and can be left on the lake.

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy, Other

Other: Paddlesports on Lake Macquarie have no storage outrigger canoes. For the elderly, special and those living in apartments it means they can not paddle or it becomes costly. I paddle in a few clubs and find it so sad to see that there are no spots to cater for a lovely sport.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Community friendly for paddle sports for those wanting a safe and enjoyable experience like no other. For those scared to paddle alone and who feel safe confident in the specialised canoes. To enjoy the crown land surrounding the lake. For the enjoyment of all. The healing of being on the Lake and in Nature. This sport is great for tourism and people will travel from all overseas and Australia for races and to train.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Very important

Assist new sustainable energy, resources and infrastructure projects: Very important

Facilitate investment on Crown land: Important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land:

Manage Crown land to build resilience in a changing climate: Important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Very important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Neutral

Contribute to the ongoing recognition of native title rights: Neutral

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Make the land useable and enjoyable for all and not just a minority. There are sports established on the lake like rowing and sailing but paddle sports seem to have no real area they can set up but there is ample of space unused. That would be of benefit to the community of Lake Macquarie.

7. Suburb: Wollongong
8. State: NSW
9. Postcode: 2500

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: Other

Other:

Neighbourhood Forums (NF) are independent groups run by voluntary community members assisting Wollongong City Council (WCC) with information and knowledge about their local community's aspirations, visions, needs and concerns, amongst other things. NFs operate within an agreed locality comprising various neighbourhoods NF5 includes Wollongong CBD, Northbeach, Southbeach, South Wollongong, University of Wollongong/TAFE, the Hospitals/medical precinct and other suburbs.. NF5 main concern re CL is WCC's (mis) management of Dedicated Crown Reserve D580060 at Stuart Park North Wollongong, created as a public reserve 130 years ago and is the most used and cherished local and regional coastal park on the NSW South Coast. The community has conveyed major concerns since the early 2000's about preferential leases and licences involving a locally owned restaurant and a publicly listed skydiving company, each of which alienates public access to significant areas on the park, the latter being the Oval / "village green". The community concerns include direct dealing negotiations, lack of merit based considerations, inadequate processes, possibly undue commercial and political influences, "mates rates", lack of transparency or accountability. It appears that the CLM Act provisions will only make the siltation worse for public access. The potential for privatisation is real – all over NSW - by Gov/Ministers and by Councils as CL Managers under the CLMAct 2016 On 5 Aug 2020 NF5 resolved to make a submission

expressing concerns that the draft SSP for CL appears to further facilitate privatisation and the alienation of public access for CL created many years ago with foresight for the people of NSW to use.

12. What use/s of Crown land do you value?:

Open or green space, Community use, Aboriginal land rights, Biodiversity, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.:

Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.:

Not at all important

Expand green space, sustainable quality of life and climate change resilience:

Very important

Strengthen and support evolving community connections:

Very important

Work with Aboriginal communities to realise the potential of their land rights:

Neutral

Re Introductions: Nice words from Minister Stokes, but Minister Pavey exposes the threats, ie to attract investment and create economic opportunities. We recall background concerns including: • A 2012 Mr M Carapiet was appointed to undertake a review into Crown Lands after revelations of the misappropriation of Crown lands and the government's failure to adhere to its own laws • It was subsequently revealed the report was written by Crown Lands, not by Mr Carapiet • In 2013 the Crown Lands Act (CLA) was amended Nov.2013 to make what was unlawful lawful, but it did not adequately cover the government's failures under the existing laws. • The NSW Auditor General's report Sep 2016 castigated CL department for mis-management of sale & lease of CL • The Government accepted the AG recommendations, including to identify leases which do not comply with Department policy; (develop a plan to address issues identified...'. But it appears this has not eventuated • The NSW Gov did not publish and ignored over 600 submissions on the CLM Act to replace the 1989 CL Act • The CLM Act was pushed through early morning in Nov 2016 • The Government accepted the recommendations, including to undertake a stock-take of all Crown land in NSW,; a digitisation project of maps identifying CL and publicly release an accurate register of CL; and when implementing the stock-take of CL consider an audit of its ecological value • But the public has not been made aware whether the recommendations have been implemented and no maps have been publicly released • The CLM Act leaves public land vulnerable to privatisation and gives the Minister very wide powers • The CLM Regulation reinforces concerns • The much-vaunted Community Engagement Strategy for CL does NOT apply to CL managed by Councils

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:

Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Of minor importance

Expand regional tourism:	Important
Assist new sustainable energy, resources and infrastructure projects:	Neutral
Facilitate investment on Crown land:	Not at all important
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Of minor importance

Contribute to the ongoing recognition of native title rights:	Neutral
Explore co-management of land to generate mutual benefits:	Of minor importance
Collaborate with Aboriginal groups in each place to improve outcomes:	Neutral

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

The SSP is a glossy document with plenty re Aboriginal Land Rights, which is good. And eventually it gets to how the Gov can manage CL – which the AG in 2016 found the CL dept needed radical improvement (but does not appear to have occurred) p31 includes: The priorities and desired outcomes of this plan call for an ambitious transformation of the administration of Crown lands in NSW. Q: What in the SSP indicates how this will occur A 10yr period is too short and reinforces the apparent intent of the SSP for the fast tracking commercial development and privatisation of our CL This is further reinforced by: p30 Outcomes include: • Support innovative and sustainable regional industries • Expand regional tourism • Assist new sustainable energy, resources and infrastructure projects • Facilitate investment on CL p35 includes: Promote investment by making data available • The department will seek to accelerate economic and commercial opportunities by working proactively with economic development agencies and local councils. • We will publish maps and data detailing tenure status, land reservations and other information to help identify where economic and commercial opportunities might exist for stakeholders. • This approach will make it easier for potential investors to locate prospective sites for new or expanded job-creating activities. P 36 includes: Facilitate Investment on CL • Promoting investment in improved facilities and new opportunities is one of the best ways to stimulate jobs and growth in communities. • Under this plan, CL will be managed in a way that encourages appropriate and sustainable investment and generates an appropriate return from commercial activities. • The department and CL managers can improve certainty of tenure while continuing to support the public interest objective under the Act by offering longer-term leases that

enable investors to recover their initial investment with a reasonable economic return.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Of minor importance

Reduce red tape for government entities managing Crown land: Of minor importance

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: -It is critical to retain CL in public Ownership along the east coast to assist improving liveability as populations ever increase, Social and environmental benefits must take presence over economic considerations -"Fire sales" of CL and to mates must be stopped -Transparency and accountability on dealings with CL must be paramount -Unfortunately some Councils (eg Willoughby, Newcastle and Wollongong) seem to have proven they cannot be relied on to protect CL for the people of NSW - The CLM Act & regulations should be reviewed and revised asap -The management of CL must be overhauled asap, to avoid scandals like we have experienced over the past 10 years in NSW re the sale & lease of CL - In a recent Webinar the Commissioner said the sale of CL is a "lowest order outcome" (but it's still an outcome !!) - Question 2: What provisions are there in the SSP to enable the community to be assured that further privatisation of irreplaceable and invaluable Crown Land will not be promoted, facilitated or occur? Thankyou for the opportunity to make a submission on the SSP NF5 Co-convenor

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I have a lease to use Crown land, I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: There are areas of Crown Land that are managed by other management groups, these groups are not acting in the best interest of the local communities they should support. Therefore I think

Strengthen and support local community connections should be of very high importance.

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable Not at all important

economic progress in regional and rural NSW.:

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Of minor importance

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

The Kiama Central Precinct members do not agree with the priority that crown land should be used to "Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW" This should not be included as a priority, but replaced with a priority to "Improve health (physical and mental) and social equity outcomes." . In addition there are many and better ways to "Strengthen and support evolving community connections", This priority should be changed to "Strengthen the community understanding of the importance of biodiversity, eco-system health, and wildlife corridors to a sustainable future for all"

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Not at all important

Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	The outcomes identified above as "not important at all" , may well be important in another context but not in the context of crown land management. New and different outcomes are required to be in line with the new priorities detailed in question 14. Facilitating investment in crown land is important in the right context but should not be measured on the basis of financial gain, but on outcomes for the community in terms of improved health (physical and mental), social equity, and environmental and social cohesion.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Neutral

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Neutral

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Again, the enabling initiatives would be different if the priorities are changed as proposed. For example an enabler would be to "build understanding of the importance of biodiversity, eco-system health, and wildlife corridors to a sustainable future for all". In addition, making information available is an important start, but not enough. The information needs to be available in context and in layman's terms so that it is understood by all. Likewise, simplifying red tape, leasing and licencing arrangements could be beneficial, depending on who has the power and who will be negatively impacted. It should be made clear to taxpayers and other stakeholders who will pay for the new crown land management, who will benefit and how, what commercial, local, regional and state government priorities have influenced these decisions. Who will be disadvantaged should be explicitly identified and readily available and accessible. Those who pay (taxpayers), those who benefit and those who are disadvantaged should be made clearer.

Other feedback

Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	Having areas that can be used for outdoor adventure and Camping is important for our communities , great for Australian tourism especially during this new world Post Covid. More land for recreation will help Australian rebound and it’s also great for mental health.

7. Suburb: Port Macquarie
8. State: NSW
9. Postcode: 2444

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Other

Other: Carbon sinks to help offset anthropogenic loss of native vegetation communities and destruction of native ecosystems that we depend on to supply oxygen, clean water, erosion control and climate stability. Retaining and protecting native vegetation corridors on crown lands is vital for migration of species, including plants, responding to global warming. Many contain endangered ecological communities and habitat for threatened species; these are seed banks and reference communities for regeneration of Australian species e.g. after disasters such as bushfires. Recent acceleration of land clearing in NSW to the highest level in the developed world means crown lands are more likely to be islands within cleared landscapes, preventing populations of native species from exchanging genes and threatening their longterm survival. I submit that all crown lands substantially covered in native vegetation should remain under public ownership and given appropriate long term protection with management plans to control weeds and feral animals.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.:	Neutral
Expand green space, sustainable quality of life and climate change resilience:	Very important
Strengthen and support evolving community connections:	Very important
Work with Aboriginal communities to realise the potential of their land rights:	Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

The first priority is misplaced and indicates that the NSW government's metric of crown land value is its ability to enrich a few individuals. "Jobs growth, commercial opportunities..." echoes the attitude to National Parks in NSW, which are increasingly portrayed as devices for human recreation from which economic gains are generated for the private sector. Yet at the same time NPWS staff have been cut (by three quarters in the case of senior fire managers), and facilities allowed to decline so that many popular bushwalks are unsafe. The consequent lack of resources contributed to the deaths and destruction of last summer's bushfires; and NSW will continue to be threatened by such manifestations of accelerating climate change, according to scientists. What is the evidence that the people of NSW benefit when private sector businesses get access to public lands at the expense of biodiversity values?

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Of minor importance
Expand regional tourism:	Important
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Neutral
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Neutral
Support and restore environmental values on Crown land:	Very important
Manage Crown land to build resilience in a changing climate:	Very important
Sustain the places where people come together:	Important
Partner with the organisations that serve our communities:	Important
Strengthen and uphold compliance to ensure a fair go:	Very important

Make Aboriginal land transfers a priority – and see them as an opportunity:	Very important
Contribute to the ongoing recognition of native title rights:	Very important
Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	Evidence is needed to support this proposal that support for innovative and sustainable regional industries depends on appropriating crown lands. There are alternatives especially within regional communities themselves, where existing resources and properties are available. As populations grow, public "green areas" are already being over-utilised and damaged. In Port Macquarie ratepayers fund facilities for dogs, while volunteers struggle to protect koalas that have no safe road crossings and die due to habitat loss, which the state government could act to protect. Better planning in urban areas is needed to provide more parks, vegetated areas and quiet spaces for residents.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Red tape is not defined so this question and this initiative/enabler is meaningless. If reducing red tape means that ministerial discretion can override expert advice and/or legislation, then I am strongly opposed to it for any reason.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: The NSW government is complicit in the ongoing destruction of native vegetation communities. There is a mass extinction event underway, where we will lose many of our unique animals and plants that are adapted to Australia's climate, which has always been variable. We could lose the very species such as native grasses that can help us survive in the hotter, drier, more unpredictable and more dangerous climate now manifesting. So it is vital to protect and conserve vegetated crown land, where species survive and persist because the land is not privately owned and not dedicated to "productive" uses.

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Neutral

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

I am concerned that biodiversity conservation and enhancement, conservation of wilderness and protection of wilderness around water catchment are not identified as high enough priorities or not flagged at all as important. Loss of biodiversity over the fires of 2019/20 has been immense in NSW. I believe anywhere with significant importance in terms of conserving habitat for endangered and threatened species and protecting clean and secure water to our river systems is paramount. An involvement by indigenous knowledge holders in such strategic management would provide meaningful empowering employment.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

- Support innovative and sustainable regional industries: Important
- Expand regional tourism: Important
- Assist new sustainable energy, resources and infrastructure projects: Neutral
- Facilitate investment on Crown land: Not at all important
- Prioritise the use of Crown land for green and open space in urban areas: Very important
- Use Crown land to expand access to affordable housing: Not at all important
- Support and restore environmental values on Crown land: Very important
- Manage Crown land to build resilience in a changing climate: Very important
- Sustain the places where people come together: Neutral
- Partner with the organisations that serve our communities: Important
- Strengthen and uphold compliance to ensure a fair go: Neutral
- Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	The enhanced role of indigenous knowledge holders and the enhanced role of NPWS staff and their expertise is paramount.

Other feedback

This review at this juncture in time when the natural environment of NSW has been so extensively damaged through the bushfires is hugely significant. The crown land around where we have 40 acres, on the South Coast of NSW, acts as important refugia for wildlife in times of bushfire, drought and flood. I acknowledge the need to allocate crown land for a growing and expanding population but I do not want to see this occur where communities of wildlife occur. Allocating significant tracts of Crown land for conservation across NSW can address strong local and international concern about the demise of iconic species such as koala, quoll, and many others which we are only now realising are in decline, as a result of the fires. In addition to this, as someone engaging with the local indigenous community to apply cultural burning practices on our own property, I have witnessed first hand how beneficial meeting indigenous community on their terms where they are the experts, can be. This same strategy can be so important to a strategy involving Crown Lands Strategy. It is also an opportunity to provide meaningful employment to our first nations - through land and stream management employment.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: I do not believe crown land should be used for 'commercial opportunities' or renewable energy that impacts the environment at all. Too often compromises are made in the name of progress and at this critical juncture in time biodiversity & habitat must be sacrosanct.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Of minor importance

Expand regional tourism: Of minor importance

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Of minor importance

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Partner with the organisations that serve our communities: Of minor importance

Strengthen and uphold compliance to ensure a fair go: Of minor importance

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Of minor importance

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: As previously mentioned, the environment and habitat biodiversity must be prioritised above all else, no compromises should be made for commercial interests - Australia has the highest rate of mammalian extinction in the world. Crown Land should be used to protect native flora & fauna where possible, also flowering plants to encourage insects and build wildlife corridors. I do approve of community groups on crown land where they are improving biodiversity, local food production, sustainable creative pastimes that foster happiness and wellbeing in all age groups. I don't believe commercial interests should be able to profit from crown land.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Provide tools and resources to volunteer Crown land managers: Important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: I would personally love to be involved with crown land use, I guess I am just wary after seeing/reading so many failed government initiatives that are supposed to be for public benefit - eg. "sportsroughts", and similar where people are using these things to make private money and my number one priority is that the environment & biodiversity should be put first and these areas should be used to promote a love of nature which is very beneficial for mental health and happiness.

Explore co-management of land to generate mutual benefits: Of minor importance

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

The most important outcome should be to maintain biodiversity and to support regeneration for areas that require it. I say no to Support innovative and sustainable regional industries because I do not think we should interfere in anyway with what should be natural environment. We should be conserving and protecting. Expanding regional tourism must be looked in a way where again the priority is to conserve and protect the natural environment, ie not developing natural areas. We do not need to "Assist new sustainable energy, resources and infrastructure projects" in areas that contain biodiversity as we can do this on land that is already developed We do not need to "Facilitate investment on Crown land" , we just need to protect and conserve what is there.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Key issue is to facilitate Dis-used Rail Easements into Rail Trails for use by cyclists, walkers, in-line skaters, people on mobility scooters and community activities (as has been achieved on Tumbarumba-Rosewood Rail Trail - a remarkably successful outcome). Rail Trails not only provide substantial economic boost to small rural businesses but strengthen physical & mental health, link communities as well as providing opportunities for improving understanding of Indigenous & European history and local fauna, flora and geograhly. Such an opportunity will arise with proposed 214km Queanbeyan - Bombala Railtrail as per Snowy Monaro Regional Council Feasibilty Report on the Monaro Rail Trail.

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Important

"Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW" should not be included as a priority for use of Crown Lands at all. I believe that Crown Lands were set aside and still should be available for use by the whole of the community and not to be sold off to the highest bidder for the benefit of the already rich and wealthy. I understand Crown Land is owned by all the people of NSW and should remain in their ownership. The sole priority for Crown Lands should be to 'Expand green space, sustainable quality of life and climate change resilience'. This priority ensures the availability of Crown Land for all people for recreational purposes to increase their opportunity for a sustainable quality of life. At the same time by retaining Crown Land as green open space it will assist in maintaining climate change resilience for many reasons of which you are aware. Crown Lands should only be used to 'Strengthen and support evolving community connections' if they remain in the ownership of, and for the use of the whole community. The priority of 'Work with Aboriginal communities to realise the potential of their land rights' is important if the Crown Land under consideration is of significance to that local Aboriginal community and maintenance plans for that land is in place at the time of the handover. Included as a priority should be 'Adequate availability of funding to maintain these Crown Land open, green spaces.

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Not at all important

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Not at all important

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

*The use of Crown land for green and open space in urban areas' should not be restricted to urban areas but include all areas. *'Facilitate investment on Crown land' should not be included. *'Expand regional tourism' should only be included if it is ecotourism which aims to increase respect, value and the enjoyment of the natural environment and does not involve any activities or infrastructure which destroys or threatens the natural environment. *'Sustain the places where people come together' is desirable this does not involve infrastructure detrimental to the environment but provide tranquil natural settings for people to enjoy together. *'Make Aboriginal land transfers a priority' if the land is of specific significance and plans are in place for its sustainable management. *While infrastructure for sustainable energy is essential it is not suitable for Crown Lands. *'Partner with the organisations that serve our communities' is desirable if these organisations aim to preserve and respect the natural environment. *Explore co-management of land to generate mutual benefits if this results in improved environmental outcomes

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Not at all important

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Generally by ticking the 'not at all important' I really mean strongly disagree. The enablers 'Standardise leases and licensing for common activities; Simplify licensing for domestic waterfront structures; Reduce red tape for government entities managing Crown land' are designed to facilitate the fast tracking of unsustainable and detrimental developments and infrastructure and I do not agree with them because every case should be assessed on its impact. I agree with 'Engage and support a new generation of Crown land managers' if their aim is to protect and preserve the natural environment and not destroy and develop Crown Land. A significant enabling initiative would be to increase funding for the maintenance and protection of the natural environment on Crown Lands. This could be made available to environmental groups, Aboriginal Communities and local governments in the form of increased grant funding.

Other feedback

I believe Crown Land *was originally set aside for all the people of NSW and should remain in their ownership. *should be maintained as open green spaces for habitat and where suitable for the use of all the people for recreation and leisure *SSP should not facilitate commercial development and privatisation of our Crown Land for any reason including commercial opportunities, industry, housing or any tourism which is detrimental to the natural environment. *which is maintained as green open space passively assists climate change resilience in many ways. Also the SSP should be suspended until the following overdue recommendations have been addressed. 29/8/16 Sale and Lease of Crown Land recommendations which were accepted by the Department of Industry including: '1.(a) identify leases which do not comply with Department policy; (b) develop a plan to address issues identified' (Recommendation by The Auditor-General's Report - On 13/4/17 the 20 recommendations in response to the Crown Land Inquiry which were supported by the Minister for Lands and Forestry and Government including: 9. undertake a stock-take of all Crown land in NSW 10. undertake a digitisation project of maps identifying Crown land in NSW and publicly release an accurate register of Crown land. 11.when implementing the stock-take of Crown land in NSW at recommendation 9, must consider an audit of its ecological value. These overdue recommendations do not appear to have been addressed nor the maps released. These should be addressed before the SSP is considered.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

20. Where did you hear about the State Strategic Plan?:

Social media, Ad in local paper, Other

Other:

Concerned local residents, Tweed Shire Council, Fingal Head Coastcare, Fingal Head Community Association.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am a Crown land manager, I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I care about Crown land management as a resident of New South Wales, Other

Other: Fingal Head Coastcare is a voluntary incorporated landcare group who maintain 32 hectares of Crown Land under the guidance of Tweed Shire Council who are the Crown Land Managers of the area in which we work. We have been operating continuously for 34 years and have 182 current members.

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity
Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Important

As a landcare group regenerating and maintaining native vegetation including the endangered ecological community of Littoral Rainforest on Crown Land we believe the sole priority for Crown Lands should be to 'Expand green space, sustainable quality of life and climate change resilience'. This priority aids increased biodiversity, provision and expansion of habitat for flora and fauna. By maintaining and expanding green space climate change resilience is addressed for the many reason of which you are aware. We believe the priority "Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW" should not be included as a priority for use of Crown Lands at all as it severely limits the outcomes of the above priority and reduces accessibility of significant natural areas for Australian citizens for recreation and the associated opportunity for a sustainable quality of life. Crown Lands are owned by all the people of NSW and should remain in their ownership and be available for use by the whole of the community. Crown Lands should only be used to 'Strengthen and support evolving community connections' if they remain as green space owned by the whole community.

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

Important

Engage and support a new generation of Crown land managers:

Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Selecting 'not at all important' equates to we strongly disagree. The enablers 'Standardise leases and licensing for common activities; Simplify licensing for domestic waterfront structures; Reduce red tape for government entities managing Crown land' are designed to facilitate the fast tracking of unsustainable, unsuitable and detrimental infrastructure and developments and as such is undesirable. All applications and licences need to be individually assessed to ensure they do not cause damage to the natural environment on Crown Land. Increased funding for the maintenance and protection of the natural environment on Crown Lands should be an enabling initiative. Increased funding would provide more employment opportunities and grants could be made available to environmental and community groups, Aboriginal communities and local governments to maintain Crown Land.

Other feedback

FHC strongly believe that: *Crown Lands should be maintained as open green spaces' to preserve significant natural areas, increase biodiversity, expand habitat for flora and fauna including endangered species and increase climate change resilience *Green open spaces should be available for the use all the people for recreation and leisure if these areas are not damaged by this use. *SSP should not facilitate commercial development and privatisation of our Crown Land for any reason including commercial opportunities, industry, housing or any tourism which is detrimental to the natural environment. *Crown Land which is maintained as green open space passively assists climate change resilience in many ways as accepted by climate change scientists.

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Not addressing local issues in this survey

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:
 Local issues are not being addressed There are very isolated properties within the Crown portfolio that should be sold at \$1 per property to the adjoining Owners which have no value to the Crow to hold on to. These Crown leases are where 100 years ago there road might have identified but have been abandoned and maybe out of sinct with the adjoining usage of Land. The Crown has a large department of workers collecting rent for these Crown leases which should be converted to form part of adjoining freehold land

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?:
I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I care about Crown land management as a resident of New South Wales

Other:
I am an avid mountain biker and many of the tracks I enjoy are on Crown/state owned land. I help maintain these tracks through making sure proper irrigation is in place and also protecting local native flora. I feel I am a steward of these tracks on crown land. Unfortunately most of these tracks are 'non-sanctioned' making them illegal. I am hoping crown land can be sanctioned for MTB usage to stewards like myself who use, love, and take care of this land.

12. What use/s of Crown land do you value?:
Other
Sport - Mountain Biking, Bush Walking, multiple use

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience:	Very important
Strengthen and support evolving community connections:	Very important
Work with Aboriginal communities to realise the potential of their land rights:	Of minor importance
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	There are vast tracks of untouched crown land. Working with mountain bike land stewards like myself, crown land could be opened up through track building where access through walking and biking would allow NSW residents (and others) to legally enjoy the beauty of these lands. This could easily be done at a community level with minimal govt. intervention, cost, or supervision

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Very important
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Important
Prioritise the use of Crown land for green and open space in urban areas:	Important
Use Crown land to expand access to affordable housing:	Not at all important
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Important
Sustain the places where people come together:	Very important
Partner with the organisations that serve our communities:	Very important
Strengthen and uphold compliance to ensure a fair go:	Important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Neutral
Contribute to the ongoing recognition of native title rights:	Neutral
Explore co-management of land to generate mutual benefits:	Very important
Collaborate with Aboriginal groups in each place to improve outcomes:	Neutral
Do you believe that any changes should be made to these outcomes or would you like to suggest any other	Co-management of land where the NSW trusts and work with people who utilise these lands currently and who can be recognised and legitimised is very important

outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Very important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Neutral

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Transparency through clarity of who can gain permission to utilise land is stated above and very important

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

20. Where did you hear about the State Strategic Plan?: Other

Other: Through my mountain biking club/organisation

9. Postcode: 2119

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Jobs and economic growth, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Crown land should be zoned into pristine land, Aboriginal land, Important fauna, and flora areas and conditions should be set on how it can be used for sustainable green business so as to create community benefits with compromising the environment.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Neutral
Expand regional tourism:	Very important
Assist new sustainable energy, resources and infrastructure projects:	Neutral
Facilitate investment on Crown land:	Important
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Very important
Support and restore environmental values on Crown land:	Very important
Manage Crown land to build resilience in a changing climate:	Very important
Sustain the places where people come together:	Very important
Partner with the organisations that serve our communities:	Of minor importance
Strengthen and uphold compliance to ensure a fair go:	Important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Important
Contribute to the ongoing recognition of native title rights:	Very important
Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	I believe consultation is important but it should not hinder the process to getting an outcome. Sometimes consultation can paralyze progress.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:
A standard lease or licence agreement for agricultural shows with a long tenure to enable infrastructure investments benefits to be realised, long term planning, sustainable future for agricultural shows and consistency across the state.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

In summary our main strategic concerns are: 1. A standard long-term lease or licence be developed for Agricultural Shows; 2. The Act does not allow the tenant to directly apply to Crown Lands for a long term licence, only the Crown Land Manager can apply. This arrangement should be considered for review; 3. Bring forward the target for supporting tourism activities for showgrounds; 4. A guide developed to expand on the Diagram of the Showground of the future on page 45, Section 3 Figure 7, to outline the minimum functional characteristics for a showground; 5. Ensure showgrounds continue to be able to run their annual agricultural show; 6. Is the Local Government Act the best approach for stakeholders to secure tenure on Crown Land Showgrounds? The Agricultural Societies Council of New South Wales Ltd would welcome the opportunity to discuss any concerns or suggestions the Commissioner, the Minister or the Department might have.

20. Where did you hear about the State Strategic Plan?:

Social media, Crown Lands website, Correspondence from the department

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

the King Edward Park Headland reserve case was a Hallmark case that showed that a DA application for a function centre on land reserved for public recreation was unlawful. it was expensive and the Friends of King Edward pal won the case with costs. The Council was warned the that an approval for the DA was unlawful by a top silk's opinion but persisted. the Council and the State officers were shown (through GIPA documents) to be totally supportive of the developer . Biscoe J. in an interlocutory case for costs stated that the FKEP was a community group attempting to save public land dedicated for public recreation for public use and attempting to enforce public law obligations on the Minister and the council. COMMENT IT SEEMS T ME THAT THIS CHNGE TO THE CROWN LAW ACT IS DIRECTED AT MAKING THE COMMERCIALISATION OF CROWN LANDS EASIER WITHOUT THE STIGMA OF FAILING TO UPHOLD LEGAL OBLIGATIONS

20. Where did you hear about the State Strategic Plan?:

Other

Other:

A strong interest in the mismanagement of Crown Land following my involvement in the King Edward headband Case and though contact with other similar discouraged community groups.

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Absolutely. Every outcome should be pursued only with the protection of habitat, native flora and fauna and biodiversity as the first priority. With this as an absolute and fundamental foundation other outcomes can be pursued in the knowledge that the future of the these areas will be protected for this and all future generations.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures:	Not at all important
Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	The key enabling initiative that should proceed all others is the protection and care for native flora and fauna, and importance of biodiversity. Without this terrible and devastating mistakes are likely to be made in the pursuit of the strategic priorities and objectives of the plan.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Biodiversity and the protection of native flora and fauna must be the foundation to any strategic plan relating to Crown land. Biodiversity and our native flora and fauna unpin our future economic and environmental wellbeing. It would be disastrous to ignore their importance and not understand how rich they make us now and into the future.

20. Where did you hear about the State Strategic Plan?: Other

Other: A friend, through word of mouth.
